

ROHIT T SANGMA

Computer Science Student | Aspiring Software Engineer

Khanapara, Meghalaya | +91 9706093811 | rohitsangma17@gmail.com | LinkedIn: /in/rohitsangma | GitHub: /RohitSangma

PROFESSIONAL SUMMARY

GATE-qualified Computer Science student at USTM with a strong technical foundation in AI, Data Science, and Software Engineering. Experienced in full-stack web redesign, technical QA diagnostics, algorithmic recommendation systems, and startup founder research.

KEY PROJECTS

Movie Recommendation System | Python, Data Science, Machine Learning, Pandas, NumPy

- Built an end-to-end recommendation engine analyzing movie metadata and user preference patterns to deliver personalized movie suggestions.
- Processed, cleaned, and structured large datasets using Pandas and NumPy, applying content-based algorithmic filtering to output recommendations.

Smart Crop Disease Detector | Python, CNN, Deep Learning

- Developed a Convolutional Neural Network (CNN) model to automate plant disease identification from smartphone leaf images.
- Managed full project lifecycle from dataset preprocessing and training to model evaluation and GitHub repository deployment.

Trade Predict AI | Python, Technical Analysis (RSI/EMA)

- Architected a financial market trend prediction tool using quantitative technical indicators (RSI, Exponential Moving Averages).
- Integrated automated risk-reward logic and price action analysis to align predictions with institutional trading standards.

Pharmacy Management System | SQL, System Design (UML/DFD)

- Designed an inventory and expiry tracking database architecture utilizing structured Data Flow Diagrams (DFDs) and UML class modeling.
- Optimized SQL database queries to handle multi-table joins for efficient real-time sales and stock processing.

EXPERIENCE

Doer.global — Software & Product Development Intern

- Website Redesign:** Refactored front-end HTML/CSS/JavaScript layout structures for Doer.global, significantly improving mobile and desktop responsiveness, navigation clarity, and page rendering speed.
- Technical QA & Diagnostics:** Reviewed SvelteKit / PWA web applications (Script Runner) and generated formal feedback reports detailing missing SEO metadata (<title>, <meta description>), social card preview tags, and SSR initial load delays.
- Ecosystem & Founder Research:** Contacted 20+ early-stage startups and interviewed founders to analyze fundraising bottlenecks, identifying key hurdles in investor networking and incubation equity terms.
- Product Frameworks:** Studied Lean Startup methodologies, including Rob Fitzpatrick's 'The Mom Test' for non-biased user research and the Build-Measure-Learn loop via Zappos and Angellist case studies.

TECHNICAL SKILLS & CERTIFICATIONS

- Languages & Web:** Python, C/C++, SQL, JavaScript, HTML/CSS, PHP, Bootstrap, React JS / Native
- Data Science & AI:** Machine Learning, Data Science, CNN / Deep Learning, Pandas, NumPy
- Tools & Methodologies:** Git / GitHub, Agile / Build-Measure-Learn, Product QA, Technical Research
- Certifications & Achievements:** GATE 2026 Qualified (Computer Science & IT)

EDUCATION

B.Tech in Computer Science and Engineering (CSE)

University of Science and Technology, Meghalaya (USTM) | Expected 2027
